Golf Corporate Solutions

MOBILE SCORING

GCS launched its proprietary Live Scoring and Leaderboard APP eight years ago; becoming one of the first companies in the country to bridge the golf technology gap. Today, GCS is on-site at more than 60 events a year. This software creates an exciting player experience and adds a new tournament revenue stream for potential sponsors. Here is how it works…

- ➢ GCS team on-site:
  - o **Prior** to golf each group will receive a pre-loaded 9" Samsung tablet and personal instructions on how to score and view the leaderboard.
  - o **During** golf the GCS team will manage the scoring and periodically check in with the golfers to ensure any questions they may have are answered.
  - o **Post** golf the GCS team will set-up our display television, compute the tournament results and hand the results to the designated Tournament Director.
- ➢ The Live Leaderboard will be available to view throughout the round via each groups' 9" Samsung tablet and displayed on our 50" TV.

TOURNAMENT ENHANCEMENTS

- ➢ Additional logo display opportunities:
  - o Display the tournament logo at the top of the scorecard and in the left corner of the leaderboard.
  - o Display the mobile scoring sponsor logo or transition up to 18 different logos that change after each hole at the bottom of the Mobile Scorecard and at the top right corner of the Live Leaderboard.
- ➢ Additional sponsor recognition via team name.
- ➢ Live updates on pace of play.
- ➢ Ability to send out instant messages to the entire tournament field at any time.
